CSCI 4211/5211: Mobile Computing and Programming HW Assignment # 4

Due Date: April 26, 2022 @ 11:55 PM

In this HW we will modify and extend the Address Book App as follows:

- Modify the app to display name as well as phone number of your contact in the main activity
- Add the functionality to display contact information when a user click on the contact name in the main activity.
- Add functionality to delete a contact from the list.
- Add functionality to edit a contact in the list.

You can download Address Book App from GitHub using one of the following links:

Phone Book App (using raw SQL): https://github.com/DrL-UCD/PhoneBookV2.git

Phone Book App (Using ROOM library): https://github.com/DrL-UCD/PhoneBookApplicationV2.git

Please do the followings when you submit your assignment.

- Create a zip file that contains your project folder.
- Please use the following convention when you create a zip file FirstName LastName HW4.zip
- Upload your zip file into Canvas.
